

### Entering 3rd Grade Summer Math Skills Review

Students **MUST** be **LOGGED** into **IXL.com** with their own username and password. Students will “ Master “ the following skills on 3rd Grade IXL between the date of June 2, 2018 and August 17, 2018. If your child has already worked on any of these skills during the school year, IXL generates new problems so it is possible to “ remaster ” these skills and practice during the specified dates. The first test of the school year will be based on the skills from this summer practice. As a suggestion the public library offers free internet service where children can complete the requirements. Parents, please place your signature next to each completed skill. Thank you!

| IXL Required Skill                             |
|--|
| <b>B.2 - Place Value models to thousands</b>   |
| <b>C.1 Add Two Numbers up to Three Digits</b>  |
