

Dr. Codee Spinner

Band Director

Educational Philosophy:

My mission as a teacher is to give my students the foundation and tools they need to become lifelong learners and musicians. Every student might not become professional musicians and performers, but the skills and lessons they learn in band can have positive effects on their lives for years to come. I believe that every child is musical and should have access to quality music education. My goal is to provide my students with a safe and positive learning environment where they can make mistakes, learn from those mistakes, and continue to grow. I believe that what we learn along the way to achieving our goals has the potential to be even more fulfilling and rewarding than the goal itself. I see my role as a guide through this process, to help my students along the way to achieving their goals and fulfilling their potential.
