

**Philosophy of Education  
Mr. Gene Drum**

**I believe that every child brings special gifts to the classroom and to the school.**

**Each of them has been created, by God, to be a unique being whose talents and viewpoints, with the teacher's guidance, help to determine the classroom environment.**

**Our job, parents and teachers, is to support and foster them as they develop as Christians, sons and daughters, students, and finally, strong independent adults.**

**I believe that the Catholic schools provide a wonderful opportunity to instill in their students a moral compass based on the teachings of Our Lord Jesus Christ.**

**These are God's children.**
