### Educational Philosophy

My philosophy is to make a difference in each of my students' lives by providing a safe, nurturing and positive learning environment in which children can learn and grow. To be effective I will support and encourage learning on many different levels to include all types of learners. I will motivate and inspire my students showing them love and respect! Each student matters and we are all a piece of our classroom puzzle. Together as a team all things are possible! The passion I have for the students and teaching will shine bright every day in my enthusiasm and love for God!
